

## List of contents Volume 33 (2004)

### Issue 1

<b>Publisher's note</b>	v
D. Dvir and T. Lechler, <b>Plans are nothing, changing plans is everything: the impact of changes on project success</b>	1
E.M. Mora-Valentin, A. Montoro-Sanchez and L.A. Guerras-Martin, <b>Determining factors in the success of R&amp;D cooperative agreements between firms and research organizations</b>	17
D. Cassimon, P.J. Engelen, L. Thomassen and M. Van Wouwe, <b>The valuation of a NDA using a 6-fold compound option</b>	41
G. Mason, J.-P. Beltramo and J.-J. Paul, <b>External knowledge sourcing in different national settings: a comparison of electronics establishments in Britain and France</b>	53
C. Lyall, A. Bruce, J. Firn, M. Firn and J. Tait, <b>Assessing end-use relevance of public sector research organisations</b>	73
S. Casper and R. Whitley, <b>Managing competences in entrepreneurial technology firms: a comparative institutional analysis of Germany, Sweden and the UK</b>	89
E. Autio, A.-P. Hameri and O. Vuola, <b>A framework of industrial knowledge spillovers in big-science centers</b>	107
M. Balconi, S. Breschi and F. Lissoni, <b>Networks of inventors and the role of academia: an exploration of Italian patent data</b>	127
A. Vohora, M. Wright and A. Lockett, <b>Critical junctures in the development of university high-tech spinout companies</b>	147
<b>Book review</b>	177
<b>Instructions to Authors</b>	I

### Issue 2

<b>Publisher's note</b>	iii
E.F. Sherry and D.J. Teece, <b>Royalties, evolving patent rights, and the value of innovation</b>	179
J. Faber and A.B. Hesén, <b>Innovation capabilities of European nations. Cross-national analyses of patents and sales of product innovations</b>	193

W. Becker and J. Dietz, <b>R&amp;D cooperation and innovation activities of firms—evidence for the German manufacturing industry</b>	209
S.J. Appold, <b>Research parks and the location of industrial research laboratories: an analysis of the effectiveness of a policy intervention</b>	225
M. Fritsch and G. Franke, <b>Innovation, regional knowledge spillovers and R&amp;D cooperation</b>	245
J. Stowsky, <b>Secrets to shield or share? New dilemmas for military R&amp;D policy in the digital age</b>	257
F.F. Suarez, <b>Battles for technological dominance: an integrative framework</b>	271
K. Lim, <b>The relationship between research and innovation in the semiconductor and pharmaceutical industries (1981–1997)</b>	287
M.L. Flor and M.J. Oltra, <b>Identification of innovating firms through technological innovation indicators: an application to the Spanish ceramic tile industry</b>	323
S.-H. Chen, <b>Taiwanese IT firms' offshore R&amp;D in China and the connection with the global innovation network</b>	337
P.D. Morrison, J.H. Roberts and D.F. Midgley, <b>The nature of lead users and measurement of leading edge status</b>	351
<b>Erratum</b>	363

### Issue 3

S. Negassi, <b>R&amp;D co-operation and innovation: a microeconomic study on French firms</b>	365
P. Windrum, <b>Leveraging technological externalities in complex technologies: Microsoft's exploitation of standards in the browser wars</b>	385
R. Kaiser and H. Prange, <b>The reconfiguration of National Innovation Systems—the example of German biotechnology</b>	395
E. Özçelik and E. Taymaz, <b>Does innovativeness matter for international competitiveness in developing countries? The case of Turkish manufacturing industries</b>	409
B. Van Looy, M. Ranga, J. Callaert, K. Debackere and E. Zimmermann, <b>Combining entrepreneurial and scientific performance in academia: towards a compounded and reciprocal Matthew-effect?</b>	425
N. Viner, P. Powell and R. Green, <b>Institutionalized biases in the award of research grants: a preliminary analysis revisiting the principle of accumulative advantage</b>	443
R.R. Nelson, <b>The market economy and the scientific commons</b>	455
F. Xavier Molina-Morales and M. Teresa Martínez-Fernández, <b>How much difference is there between industrial district firms? A net value creation approach</b>	473
S. Roper, N. Hewitt-Dundas and J.H. Love, <b>An ex ante evaluation framework for the regional benefits of publicly supported R&amp;D projects</b>	487
J. Cantwell and G. Vertova, <b>Historical evolution of technological diversification</b>	511
J. Suzuki and F. Kodama, <b>Technological diversity of persistent innovators in Japan. Two case studies of large Japanese firms</b>	531
I. Drejer, <b>Identifying innovation in surveys of services: a Schumpeterian perspective</b>	551
<b>Book review</b>	563

## Issue 4

### **Special Issue: Scientific and Technical Human Capital: Science Careers and Networks as Knowledge Assets**

**Edited by: Barry Bozeman and Vincent Mangematin**

<b>Editorial</b>	565
M. Gaughan and S. Robin, <b>National science training policy and early scientific careers in France and the United States</b>	569
A.L. Oliver, <b>Biotechnology entrepreneurial scientists and their collaborations</b>	583
B. Bozeman and E. Corley, <b>Scientists' collaboration strategies: implications for scientific and technical human capital</b>	599
S. Davenport, <b>Panic and panacea: brain drain and science and technology human capital policy</b>	617
C.D.F. Corolleur, M. Carrere and V. Mangematin, <b>Turning scientific and technological human capital into economic capital: the experience of biotech start-ups in France</b>	631
F. Murray, <b>The role of academic inventors in entrepreneurial firms: sharing the laboratory life</b>	643
J.F. Porac, J.B. Wade, H.M. Fischer, J. Brown, A. Kanfer and G. Bowker, <b>Human capital heterogeneity, collaborative relationships, and publication patterns in a multidisciplinary scientific alliance: a comparative case study of two scientific teams</b>	661

## Issue 5

B. Godin, <b>The New Economy: what the concept owes to the OECD</b>	679
M. Kenney and W. Richard Goe, <b>The role of social embeddedness in professorial entrepreneurship: a comparison of electrical engineering and computer science at UC Berkeley and Stanford</b>	691
R.J.W. Tijssen, <b>Is the commercialisation of scientific research affecting the production of public knowledge? Global trends in the output of corporate research articles</b>	709
E. González and F. Gascón, <b>Sources of productivity growth in the Spanish pharmaceutical industry (1994–2000)</b>	735
E.J. Hackett, D. Conz, J. Parker, J. Bashford and S. DeLay, <b>Tokamaks and turbulence: research ensembles, policy and technoscientific work</b>	747
M. Höyssä, H. Bruun and J. Hukkinen, <b>The co-evolution of social and physical infrastructure for biotechnology innovation in Turku, Finland</b>	769
M.S. Giarratana, <b>The birth of a new industry: entry by start-ups and the drivers of firm growth. The case of encryption software</b>	787
T. Iwasa and H. Odagiri, <b>Overseas R&amp;D, knowledge sourcing, and patenting: an empirical study of Japanese R&amp;D investment in the US</b>	807
J. Alegre-Vidal, R. Lapedra-Alcamí and R. Chiva-Gómez, <b>Linking operations strategy and product innovation: an empirical study of Spanish ceramic tile producers</b>	829
<b>Book reviews</b>	841

### Issues 6–7

K. Menrad, <b>Innovations in the food industry in Germany</b>	845
G.B. Navaretti, M. Galeotti and A. Mattozzi, <b>Moving skills from hands to heads: does importing technology affect export performance in textiles?</b>	879
F.W. Geels, <b>From sectoral systems of innovation to socio-technical systems. Insights about dynamics and change from sociology and institutional theory</b>	897
M. Lehrer and K. Asakawa, <b>Rethinking the public sector: idiosyncrasies of biotechnology commercialization as motors of national R&amp;D reform in Germany and Japan</b>	921
M. Reitzig, <b>Improving patent valuations for management purposes—validating new indicators by analyzing application rationales</b>	939
T.J. Nameroff, R.J. Garant and M.B. Albert, <b>Adoption of green chemistry: an analysis based on US patents</b>	959
A. Inzelt, <b>The evolution of university–industry–government relationships during transition</b>	975
M. Beise, <b>Lead markets: country-specific drivers of the global diffusion of innovations</b>	997
M. Hemmert, <b>The influence of institutional factors on the technology acquisition performance of high-tech firms: survey results from Germany and Japan</b>	1019
J. Chataway, J. Tait and D. Wield, <b>Understanding company R&amp;D strategies in agro-biotechnology: trajectories and blind spots</b>	1041
<b>Book reviews</b>	1059

### Issue 8

J. Watson, <b>Selection environments, flexibility and the success of the gas turbine</b>	1065
N. Carayol and M. Matt, <b>Does research organization influence academic production? Laboratory level evidence from a large European university</b>	1081
R. Helm and M. Kloyer, <b>Controlling contractual exchange risks in R&amp;D interfirm cooperation: an empirical study</b>	1103
R.C.M. Yam, J.C. Guan, K.F. Pun and E.P.Y. Tang, <b>An audit of technological innovation capabilities in Chinese firms: some empirical findings in Beijing, China</b>	1123
H. Kollmer and M. Dowling, <b>Licensing as a commercialisation strategy for new technology-based firms</b>	1141
M. Hoegl and L. Proserpio, <b>Team member proximity and teamwork in innovative projects</b>	1153
K. Dahlin, M. Taylor, M. Fichman, <b>Today's Edisons or weekend hobbyists: technical merit and success of inventions by independent inventors</b>	1167
F. Galia, D. Legros, <b>Complementarities between obstacles to innovation: evidence from France</b>	1185
K. Laursen and A. Salter, <b>Searching high and low: what types of firms use universities as a source of innovation?</b>	1201
B. Godin, <b>The obsession for competitiveness and its impact on statistics: the construction of high-technology indicators</b>	1217
A. Afuah, <b>Does a focal firm's technology entry timing depend on the impact of the technology on co-opetitors?</b>	1231
<b>Book reviews</b>	1247

## Issue 9

### Special Issue: What do we know about Innovation?

Guest Editors: Virginia Acha, Orietta Marsili and Richard Nelson

- V. Acha, O. Marsili and R. Nelson, **What do we know about innovation?** 1253
- The nature of technological knowledge**
- P. Nightingale, **Technological capabilities, invisible infrastructure and the unsocial construction of predictability: the overlooked fixed costs of useful research** 1259
- The management of research and development in the firm**
- A. Bergek and C. Berggren, **Technological internationalisation in the electro-technical industry: a cross-company comparison of patenting patterns 1986–2000** 1285
- Systems of innovation**
- V. Walsh and M. Le Roux, **Contingency in innovation and the role of national systems: taxol and taxotère in the USA and France** 1307
- J.L. Furman and R. Hayes, **Catching up or standing still? National innovative productivity among 'follower' countries, 1978–1999** 1329
- S. Jacobsson and A. Rickne, **How large is the Swedish 'academic' sector really? A critical analysis of the use of science and technology indicators** 1355
- The measurement of scientific and technological activities**
- H. Grupp and M.E. Moge, **Indicators for national science and technology policy: how robust are composite indicators?** 1373
- S. Mendonça, T.S. Pereira and M.M. Godinho, **Trademarks as an indicator of innovation and industrial change** 1385
- The legacy of Keith Pavitt**
- M. Meyer, T.S. Pereira, O. Persson and O. Granstrand, **The scientometric world of Keith Pavitt. A tribute to his contributions to research policy and patent analysis** 1405
- B. Verspagen and C. Werker, **Keith Pavitt and the Invisible College of the Economics of Technology and Innovation** 1419

## Issue 10

- M. Hobday, H. Rush and J. Bessant, **Approaching the innovation frontier in Korea: the transition phase to leadership** 1433
- J. Vicente Blanes and I. Busom, **Who participates in R&D subsidy programs? The case of Spanish manufacturing firms** 1459
- R. Belderbos, M. Carree and B. Lokshin, **Cooperative R&D and firm performance** 1477
- K. Desmet, P. Kujal and F. Lobo, **Implementing R&D policies: an analysis of Spain's pharmaceutical research program** 1493

M. Chiarvesio, E. Di Maria and S. Micelli, <b>From local networks of SMEs to virtual districts? Evidence from recent trends in Italy</b>	1509
O. Ibert, <b>Projects and firms as discordant complements: organisational learning in the Munich software ecology</b>	1529
F. Cesaroni, <b>Technological outsourcing and product diversification: do markets for technology affect firms' strategies?</b>	1547
M. Mariani, <b>What determines technological hits? Geography versus firm competencies</b>	1565
K. Blind and N. Thumm, <b>Interrelation between patenting and standardisation strategies: empirical evidence and policy implications</b>	1583
A. Fosfuri, <b>Determinants of international activity: evidence from the chemical processing industry</b>	1599
O. Sorenson and L. Fleming, <b>Science and the diffusion of knowledge</b>	1615
W. Bönte, <b>Spillovers from publicly financed business R&amp;D: some empirical evidence from Germany</b>	1635
D. Archibugi and K. Bizzarri, <b>Committing to vaccine R&amp;D: a global science policy priority</b>	1657
M.S. Dahl and C.Ø.R. Pedersen, <b>Knowledge flows through informal contacts in industrial clusters: myth or reality?</b>	1673
J. Krafft, <b>Entry, exit and knowledge: evidence from a cluster in the info-communications industry</b>	1687
<b>Book reviews</b>	1707
<b>List of Contents Volume 33 (2004)</b>	1713
<b>Author Index Volume 33 (2004)</b>	1719
